

XITIJ Services

AI and Data Governance for a Services Enterprise

An anonymised case note for services enterprises adopting AI while needing data ownership, risk controls and board-level governance.

Core positioning

XITIJ helps founder-led companies, growth ventures, family businesses, investors and strategic stakeholders become capital-ready, governance-ready and transaction-ready through structured advisory, investment facilitation, expert-bench access and execution cadence.

Business context

Technology-enabled services company piloting AI use cases across functions without clear ownership, risk review or benefits tracking.

Mandate

- Virtual CDO, CISO and PMO style AI governance mandate
- AI use-case prioritization matrix
- Data ownership and risk-control map
- Board-ready AI adoption note

Key interventions

- Prioritized AI use cases by value, risk, data readiness and complexity
- Mapped data owners, access controls and approvals
- Created AI governance cadence
- Built narrative on responsible AI adoption and operational benefits

Outcome signals

- Reduced automation sprawl
- Clearer ownership for data and model usage
- Better use-case selection with measurable benefits
- Improved confidence for client and board conversations
